

## KTH-OLI Virtual Lab October 2021

Carnegie Mellon's The Open Learning Initiative (OLI) in partnership with KTH invites you to join us for a Virtual Lab this October. Over 3 days, the Lab will provide background and hands-on experience in developing, running and analyzing online courseware using OLI's evidence-based approaches to online and hybrid learning.

Over the course of the Virtual Lab, you will learn about the Open Learning Initiative's tools and approaches for creating online learning experiences. If you partake in all three seminars you will have developed your own materials in OLI, and you'll have the know-how to take these materials and use them (to support online or hybrid instruction). You will also be able to expand upon and improve these materials using OLI tools.

So that you are able to plan, some important points:

- We are currently scheduled to run from 1400 – 1700 on Oct 18, 21, and 26. You can see the schedule here: [📅 KTH OLI Virtual Lab](#)
- The Lab will feature a mix of lectures, workshops, and peer-based activities.
- The Lab will be fully remote, with Zoom as our primary service.

If you'd like to participate in this event for any or all of the days, please fill out this survey: [OLI - KTH Virtual Lab Survey](#).

You can further prepare for by creating an account on the OLI Torus platform: [OLI Torus Account Creation](#).

We're looking forward to working with you and sharing our OLI work with you. Please reach out with any questions or requests!
