

Every good achievement starts with a purpose: committing to a goal you aspire to reach. That's why, for the duration of the Green Hero Project, we ask you to try your best and use 10% less electricity than you normally would.

If you succeed, you would save 10% electricity by the end of June 2022. So, if you are willing to give it your best shot, please fill in your initials in the text field below and click the "I will do my best" button.

If you don't want to do that, click the "No" button
