

Introduction to the admissions process for Master's programmes and NyA-webben for HT24

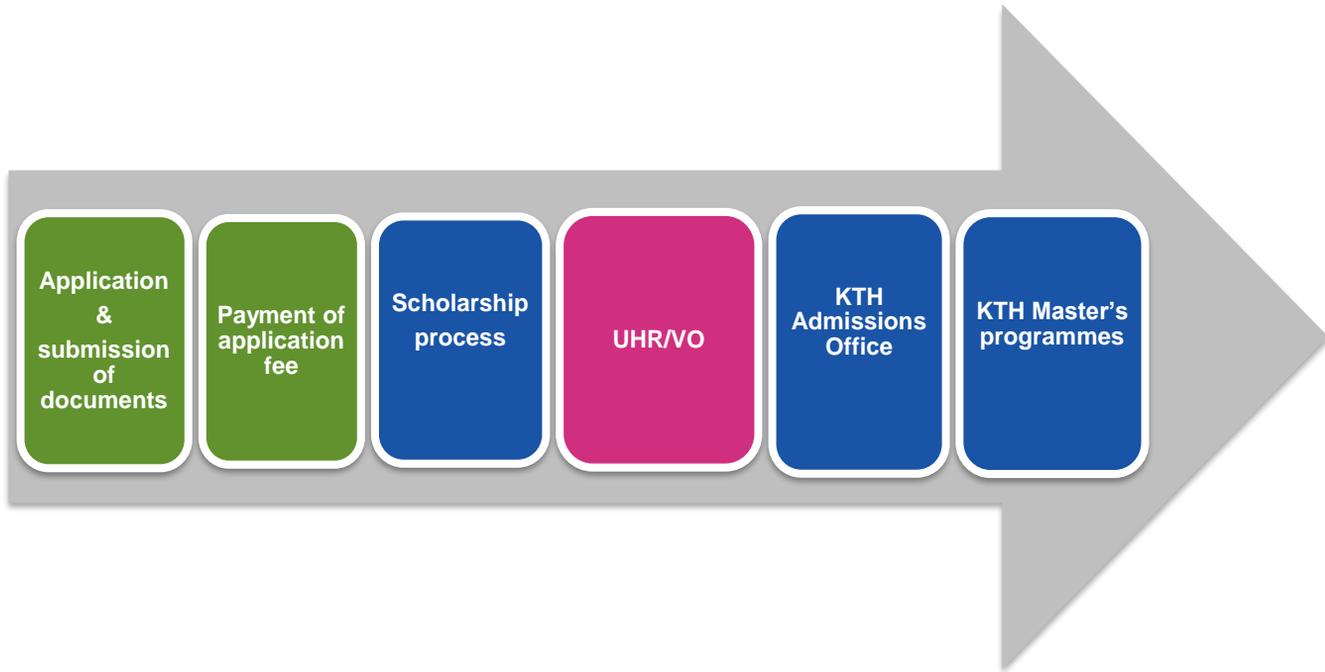

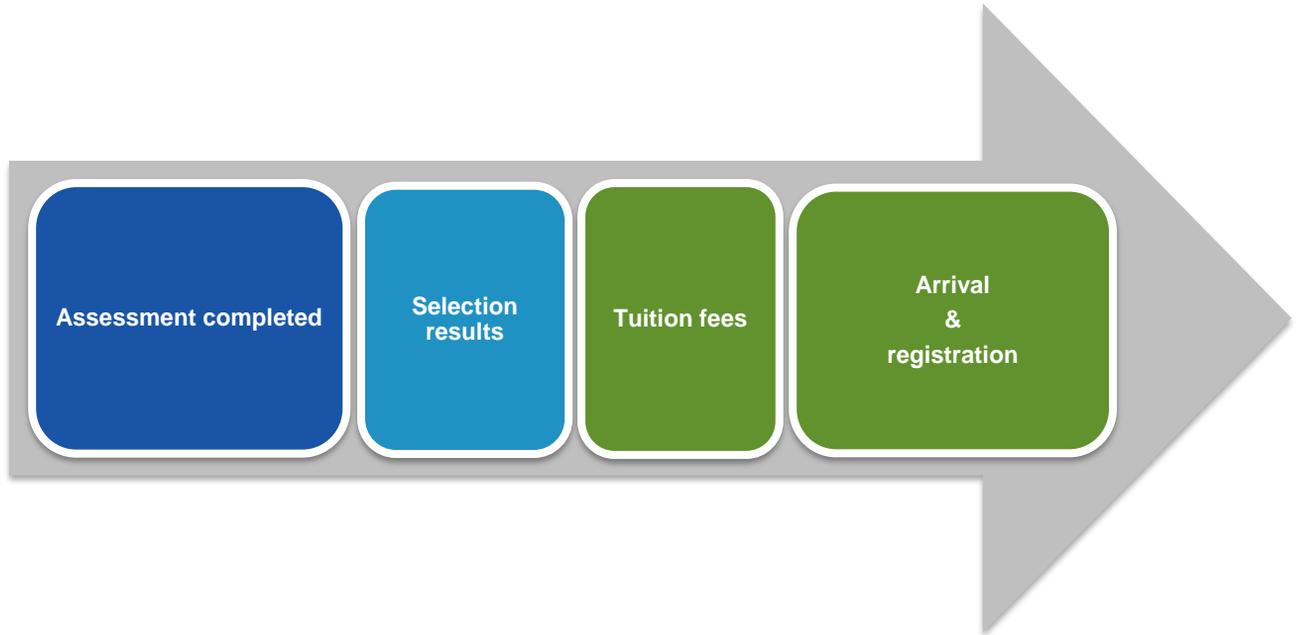

Timetable - admissions process Master 2024

2024-01-15	Online application deadline
2024-02-01	Deadline for submitting supporting documents and paying the application fee
2024-03-04	Deadline for the assessment of GBA (general admission requirements) and English (The KTH admissions office)
2024-03-11	Deadline for the assessment of specific requirements/merit value (Schools/Programmes)
2024-03-19	Selection
2024-03-21	Notification of selection results is published

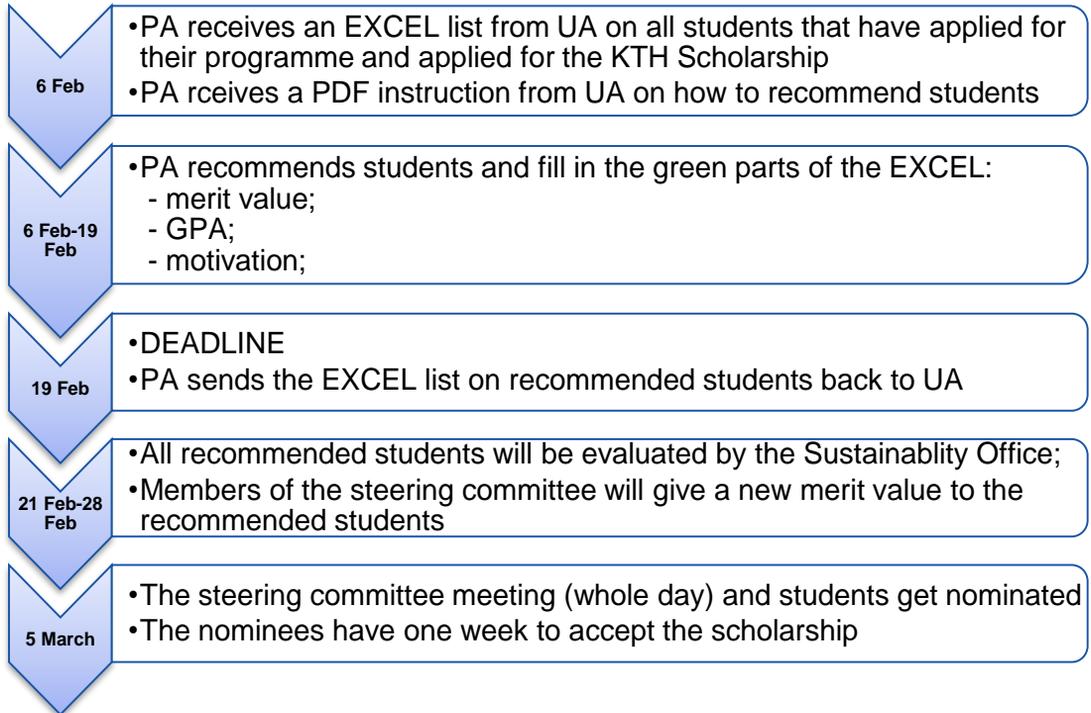

Admissions process for Master 2024 - overview of the workflow

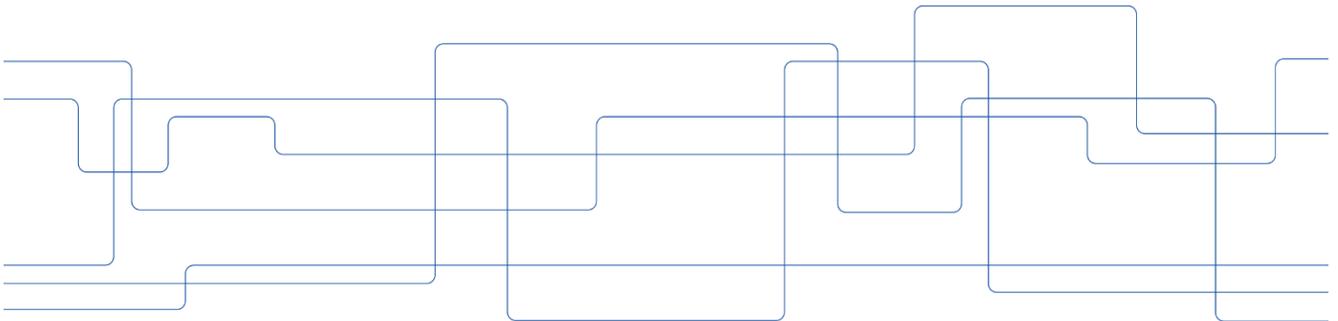

The scholarship process

NyA-webben, the basics

About NyA-webben

- NyA-webben is a web-based admission system for staff working at university departments.
- Users of NyA-webben can review applications and perform a number of tasks, such as evaluating applicants, reviewing documents and admitting students from a waiting list (reserve).

- Internal notes (blue arrow) – only visible to other administrators in NyA-webben and not to applicants. To be used as an aid during the assessment.
- Official notes (green arrow) – visible to all administrators (even nationally) in NyA. Should be used to note information about why an applicant is ineligible- helpful to the admissions office when answering questions from the applicants.

Important - When assessing specific requirements

- The specific entry requirements imposed must be totally essential for a student to be able to benefit from the programme.
- Qualified
- Not qualified – write a motivation/note!
- When you save this status – the applicant will be notified
- If you only want to pre-screen applicants use **Internal notes** (in such a case do not change the status).
- "Färdigbedömd/Assessment complete" – This box must be ticked when the entire assessment is complete with a status under "The school's/departments evaluation" and a merit value (1-75). When this box is ticked the application is complete for selection. Ineligible applicants do not need a merit value.
- Conditionally qualified (should not be used!)

Programme evaluations - summary

- **The schools/departments evaluation:** Please don't choose "conditionally qualified" – if you do your school will have to assess the "condition" and remove it in Ladok before the admitted students can be registered in August.
- Please note that the applicant can see whether you entered "qualified" or "unqualified". so only enter this information if you have completed your assessment. Be particularly careful when it comes to entering "qualified" since the students may contact you if the status should change to "unqualified".
- **Merit rating:** Do not enter "0". KTH:s evaluation scale is 1-75.
- **Färdigbedömd/Assessment complete:** This box must be ticked when the entire assessment is complete with a status under "The school's/departments evaluation" and a merit value. When this box is ticked the application is complete for selection. Ineligible applicants do not need a merit value
- **Internal note:** This note is only visible to you, other people at your school with access to NyA –webben and the KTH Admissions Office. You can and should make notes for your own use.
- **Official note:** Please use this to specify why the applicant is unqualified. This information can be read by everyone who has access to the admissions system and can help reduce the number of questions directed to you about an applicant's unqualified status.

Admitting reserves – after the selection

After the selection is completed, reserves from the waiting list can be admitted if places have been made available in the programme.

Admitted students are not required to officially accept their place. They are however encouraged to decline their places if they are not able to attend the programme.

KTH applies so called “separate admission” to the master programmes, which means that fee-paying and non fee-paying students compete in separate selection groups - AVG and BEFR, and admission numbers are set for each selection group for a programme.

The admission numbers are decided by the president and it is the admission number (per selection group) that determine how many students can be admitted. The number of students admitted cannot exceed the set numbers for each selection group.

It is not possible to "fill up" one selection group with students from the other selection group. Reserve admission is thus only possible when an admitted student has declined his/her place, leaving a vacancy for reserve 1 from the same selection group.

Students can only be admitted from the reserve list in the chronological order they are placed.

Process for reserve admission

The programmes are responsible for keeping track of the number of declined places in NyA-webben, and if they want to admit students from the reserve list, they will notify their UA.

UA makes the decision and informs the admissions office of how many reserves they wish to admit and from which selection group. The Admissions office admits the students in the system.

This is so that we can keep track of fee-paying students that need to be invoiced, and to ensure that the correct number of students are admitted.

Admitting fee-paying students from the reserve list is possible until the last week of April, while admission of non fee-paying students can continue until the start of the semester.

These dates have been set to ensure that all accepted reserves can arrive at KTH by the start of the semester and that there is time to invoice fee-paying students, so that they can pay the tuition fee and be able to apply for a residence permit.

Updated information and a detailed process for admitting reserves is always sent out to the schools after the ordinary selection is completed.

The Admissions office notifies UA when the reserve admission is complete. Admitted reserves will then get an updated notification of selection results automatically.
