

Welcome to KTH!

We are happy to welcome you as an employee at KTH and hope and strongly believe that you will enjoy your new workplace. Here you will work with colleagues with high ambitions in an open, inquisitive and dynamic environment.

KTH's assignment is to conduct research, educate and spread knowledge. Education and research cover a wide area – from science to all branches of engineering as well as Architecture, Industrial Economics, and Community Planning.

My vision is that the three mainstays equality, sustainable development and internationalization serve as guides for our mission. These aspects will permeate the way we work and be a part of everything we do - at all levels.

At KTH we are now responsible for a third of Sweden's capacity of technical research and are the country's largest provider of higher education in technical fields.

Don't hesitate to find out more about what we can offer you as an employee and what you will become a part of: <https://intra.kth.se/en/anstallning/ny-pa-kth/>

Best regards,

Sigbritt Karlsson, President of KTH
