

”Utforskande” bibliometri - SCI-skolan

Tobias Jeppsson, Publiceringens infrastruktur, KTHB

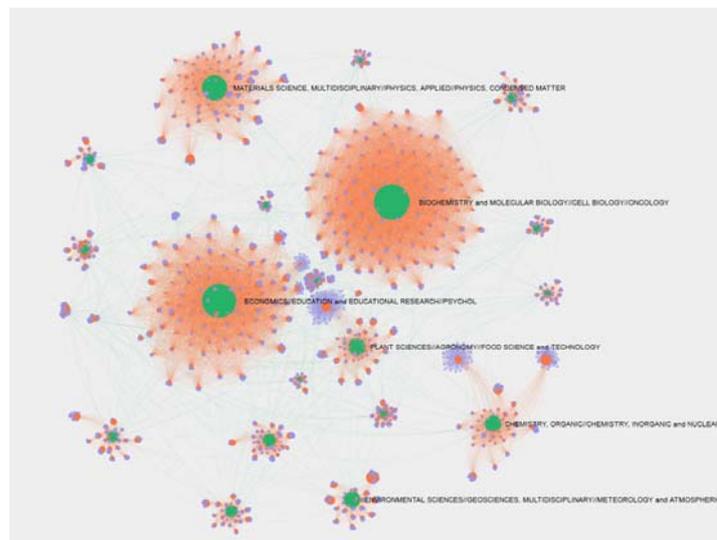

Bakgrund

- Visa upp andra delar av KTHs bibliometri, jämfört med ÅBU
 - Utvärderande vs utforskande bibliometri
- Närmare samarbete med KTH skolor
- Stöd vid ansökningar, strategiskt arbete, organisationsfrågor, rekryteringar etc (?)
- Tidigare möte med Leif och Annika ledde till detta

Klustring av all publicerad forskning

- Baserad på ca 30miljoner artiklar och deras citeringslänkar
- Hierarkisk på 4 nivåer – toppnivå på ~25 kluster och bottenivå med >37000 kluster (på ~200 – 2500 artiklar)
- Algoritmisk etikettering, samt annan info för att beskriva klusterinnehåll
- Ger en mer detaljerad och dynamisk klassificering än tex Web of Science-kategorier (som är grova, statiska, få och tidskriftsbaserade)
- Kan användas för fältnormering, identifiering av ämnen, analys av nätverk, utsökning av artiklar mm.

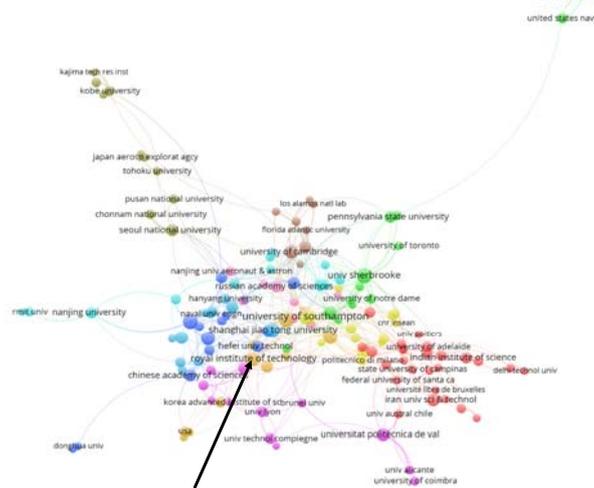

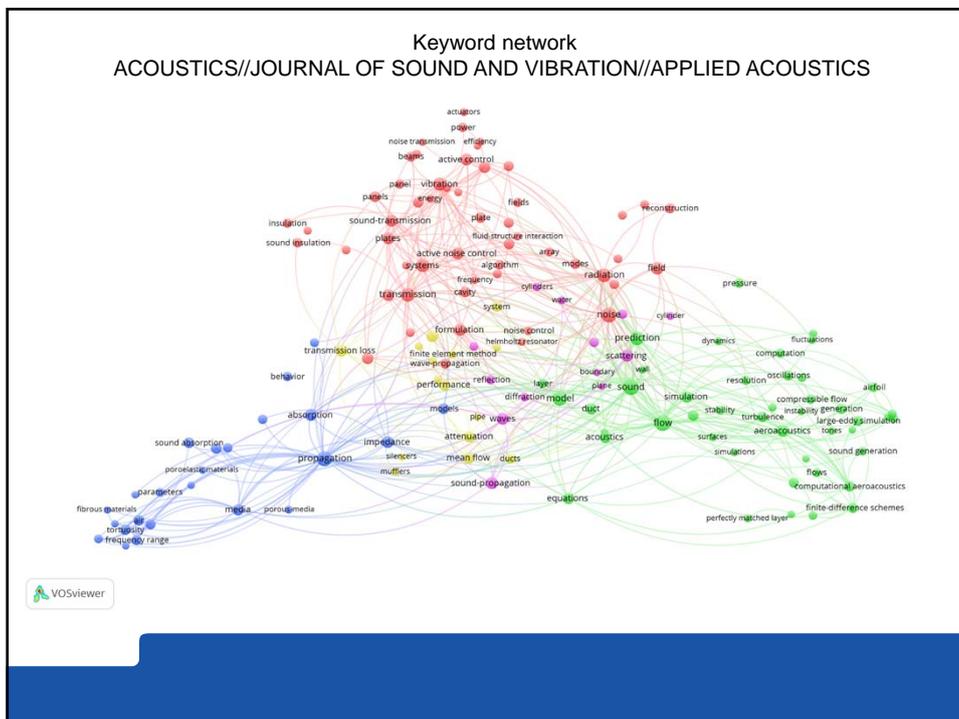

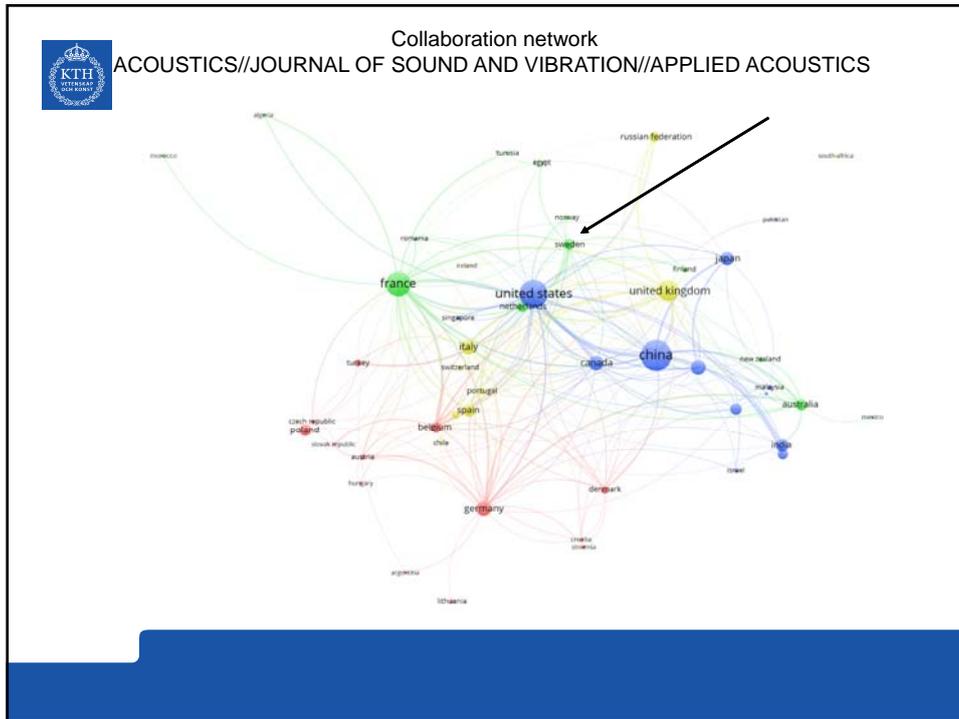

Exempel – L. Kari

Användning

- Beslutsunderlag
- Rekrytering
- Ansökningar & samarbetspartners
- Vore roligt om denna typ av analyser kunde användas ute på skolorna/institutionerna.
- Ökat fokus på "research intelligence"

Tankar / feedback?
Vad låter mest intressant?

Tack för uppmärksamheten!
