

## One page about: What's new in Agresso?

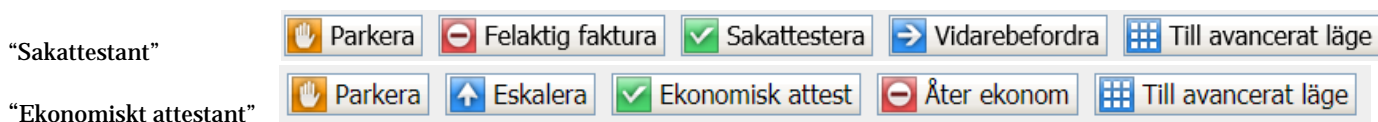

Unit4 owns Agresso and now they have rebranded Agresso to Business World On! (BWO). We will probably continue to call the system Agresso for a long time...  
Electronic invoices are now converted/presented in the new European standard Peppol. The invoices will therefore look a little bit different.

Now you find your new tasks in the top right corner:

Choices, when viewing an invoice, has now moved down to the bottom and all the icons are gone.

*Old Agresso:*

*New Agresso:*

### Handling attachments/documents

Add a new document: Click  and then click **Lägg till ett dokument** (Add document) in the bottom left corner. Put the document in the folder "Bilagor".

View attached documents: click  Change view by switching between A, B and C. In A (full view) you can view pdf-files directly in the browser. To view doc/xls-files. Change view to B or C. Right click on line/file and choose "Skriv ut" (Print). Depending on browser settings the document will now be saved or opened directly in Word/Excel.

(D presents same options as right click menu for marked document.)
