

Funding bodies' requirements regarding gender aspects.

*Jenny Wanselius, Senior Research Advisor
KTH Research Office*

Funding bodies and gender aspects

Funding bodies internal strategies:

- gender balanced evaluation panels
- counteract gender bias in evaluators
- Gender balanced granting rates

Requirements on funded research:

- gender balanced project teams and project decision bodies
- gender dimension addressed in research content

The Swedish Research Council (VR)

Strategy for Gender Equality

The Swedish Research Council should:

1. achieve and maintain an equal gender distribution in its evaluation panels,
2. ensure that the percentages of female and male applicants for grants from the Swedish Research Council correspond to the percentages of women and men among the potential research grant applicants,
3. ensure that women and men have the same success rates and receive the same average size of grants, taking into account the nature of the research and the type of grant.
4. include a gender equality perspective in each analysis and evaluation, where possible,
5. integrate a gender equality perspective in the council's external communication.

Knut and Alice Wallenberg Foundation

Wallenberg Academy Fellows

The university should strive for 40 % of the nominations to be from the underrepresented sex.

Vinnova

Call for Proposals: Competence Centre 2020

Gender equality

- both women and men should actively participate and have influence, and sex and/or gender perspectives shall be considered where relevant in the conducted research and innovation.
- The acquired funds should benefit both women and men, by way of women and men participating on equal terms in governance and implementation, and by project results contributing to increased gender equality.

Assessment of received applications

- The competence centre's composition from a gender perspective and plan for integrating gender into the competence centre's work, including involvement and influence.

The Swedish Energy Agency

objectives for gender equality in the activities for research and innovation.

- Gender distribution shall be within the numbers 40/60 in program advisory groups, strategic advisory groups, expert groups or similar appointed by the Agency.
- Gender distribution for approved applications per call shall normally be in the same range (+/- 10 %) compared to received applications.
- In a longer-term perspective, the gender distribution for applications shall be within the range of 40/60 for project leaders and research students (today the distribution is 25/75 between women and men).

Viabe Cities

Call for Proposal: Climate neutral cities 2030

2.4 Gender equality integration

Viabe Cities works to promote gender equality and gender neutrality. This means, for example, funded projects shall take into account gender equality when selecting project managers and composition of project group / project participant and gender perspective should be addressed as regards design, technology development and implementation.

In the assessment criteria:

How well does the project handle gender equality and diversity in the consortium and decision-making groups?

Formas

Annual open call for research and development projects

- Gender and other critical perspectives should be taken into consideration in the project application where relevant.

Evaluation criteria

Criteria for Scientific Quality

- Equality and gender, or other critical perspectives, must be included in the research topic whenever relevant.

The Swedish Foundation for Strategic Research (SSF)

SSF Call for Proposals: Framework Grants for Strategic Research on MED-X; Medicine meets IT, electronics, and materials research

Eligibility (1 out of 3 criteria)

- Both female and male PI's are included in the project team.

Evaluation

- SSF intends to grant similar number of projects with female respectively male main applicants (project leaders).

EU Horizon 2020

Research proposal template

1.3 Concept and methodology

Where relevant, describe how the gender dimension, i.e. sex and/or gender analysis is taken into account in the project's content.

Evaluation criteria

1. Excellence

Appropriate consideration of interdisciplinary approaches and, where relevant, use of stakeholder knowledge and **gender dimension** in research and innovation content

Horizon 2020

Grant Agreement

ARTICLE 33 — GENDER EQUALITY

33.1 Obligation to aim for gender equality The beneficiaries must take all measures to promote equal opportunities between men and women in the implementation of the action. They must aim, to the extent possible, for a gender balance at all levels of personnel assigned to the action, including at supervisory and managerial level.

33.2 Consequences of non-compliance If a beneficiary breaches its obligations under this Article, the [Commission][Agency] may apply any of the measures described in Chapter 6.

Funding bodies' requirements regarding gender aspects.

Gender aspects in research organisation – balanced teams, balanced evaluation panels, balanced granting rates

Gender aspects in research content – analysis of the relevance of sex and/or gender in the research questions.

Funding bodies can have both internal strategies and external requirements on funded projects.
