

Data Management Plans (DMP)

Lars Resman, Research Support Office
14 June 2019

Why create a Data Management Plan?

- Increased pressure from funding agencies
- Makes data management less person dependent
- Ethical & legal & IT security considerations already at start
- Connect with IP-management?

Good management of Data

- Design data management according to needs and purpose of research
- Plan data management early and structure data with good metadata from start
- A document that describes what you will do with your data **during** and **after** you complete your research
- Assign roles and responsibilities

Requirement from VR

1. Description of data
 - What type of data, format, type and volume?
2. Documentation and data quality
 - Metadata, standards, validation of input.
3. Storage and backup
 - Backup and storage during the project
4. Legal and ethical aspects
 - Legal requirement for safeguarding e.g. personal data, confidentiality, IP
5. Accessibility and long-term storage
 - How will data and metadata be made accessible?
6. Responsibility and resources
 - Who is responsible? How make data FAIR?

H2020

- For now only required if you opt in for Open data, but always encouraged to send in DMP.
- For Horizon Europe there will be a mandatory Data Management Plan for FAIR (Findable, Accessible, Interoperable, Re-usable) and Open Research Data : for all research data with possibilities to opt-out from open access requirements

Web tools for creating DNP

- DMP online

Free to register as user, you can share DMP with others. Templates focus on UK funders. Currently, only.pdf export format possible

<https://dmponline.dcc.ac.uk/>

- EasyDMP

<https://easydmp.sigma2.no/>

- DS Wizard: tool from Elixir

Template that will give you FAIR metrics evaluation of your data management. Many export formats.

Help and Support

- In collaboration with KTH Library, Research Support Office are planning to increase its support for Data management. Contact Research Support Office if you have any questions about DMP.
