To reduce the risk of infection in shared kitchens and staff rooms:

- **Keep a distance** - avoid crowding and sit with an empty chair between each person
- **Wash / disinfect your hands** before using the kitchen
- **Use paper towels**
- **Clean dishes in dishwasher** - wash / disinfect your hands before emptying

Pay attention to symptoms and **stay home** at the slightest signs of a cough, cold, running nose, fever, sore throat, headache or similar.
